# DIABETES PREVENTION AND CONTROL PROGRAM

PROGRAM INFORMATION

UTAH DEPARTMENT OF HEALTH

## DIABETES PREVENTION AND CONTROL PROGRAM

The Utah Department of Health Diabetes Prevention and Control Program (DPCP) has been funded since 1980 by the Centers for Disease Control and Prevention (CDC).

### WE WORK TO:

- >> Inform Utahns of the seriousness, symptoms, & risk factors of diabetes
- >> Help Utahns with diabetes learn to control their diabetes and prevent complications
- >> Increase awareness of methods to prevent type 2 diabetes in Utahns with impaired fasting glucose or impaired glucose tolerance
- >> Decrease or delay complications due to unmanaged diabetes
- >> Improve insurance coverage for Utahns with diabetes
- >> Assure access to high quality diabetes education programs
- >> Promote improved quality of medical care in local communities

## WHAT DOES THE DIABETES PREVENTION AND CONTROL PROGRAM DO?

The following are activities of the DPCP to improve the quality of life of all Utahns with diabetes and those affected by the disease:

- >> Collect, analyze, and distribute regional and statewide Utah diabetes data
- >> Certify diabetes self-management education programs
- >> Partner with primary care providers and other health professionals
- >> Partner with health insurance plans

- >> Conduct diabetes public awareness campaigns
- >> Offer diabetes continuing education presentations for healthcare professionals
- >> Develop, distribute, and promote "Utah Diabetes Practice Recommendations"
- >> Collaborate with diabetes agencies and stakeholders in the community
- >> Provide funding to community agencies for local diabetes activities
